Reviewed by & date: 09/03/2021

Process/Equipment Area/People at risk	Hazards/Risk (Foreseeable)	Existing controls	Severity	Likelihood	Risk rating	Additional controls/action required	Action by	Complete
<p>Currently, government scientists are unable to quantify the increase/decrease in the rate of infection (risk of the spread of COVID-19) associated with individual preventative measures imposed upon the UK population to control the spread of COVID-19. This risk – the Spread of COVID-19 – is therefore quantified once in this assessment. No reliable data is available to quantify the effect on the likelihood of spread of the virus caused by the individual risks listed below the headline risk, for example, an inability to obtain PPE or cleaning products. Consequently, it is not considered helpful and may actually be misleading to guess the individual risk rating for individual risks and control measures.</p>								
Employees/customers/suppliers /visitors/contractors/tenants/ external cleaners/vulnerable/shielded groups - elderly, pregnant workers, those with existing underlying health conditions/anyone else who physically comes into business contact with DG employees.	Spread of COVID-19		5	2	10			
GENERAL CLEANING	Poor cleaning or irregular cleaning in workplace	<p>Increased frequency of cleaning regime to ensure 'high traffic areas', in particular the kitchen (kettles, microwaves etc), keypad at a gate, padlock (where applicable), door handles, desks etc are disinfected every 2 hours. Changing facilities must be kept clean.</p> <p>Cleaning staff instructed to wash up cups in hot soapy water or they must be put</p>				<p>Line managers to remind their staff. Cleaning rota to be put in place and initialled by cleaners to confirm completion. Rigorous checks to be carried out by line managers to ensure that the necessary procedures are being followed.</p>	Cleaning staff	

Severity: 5 = V High, Multiple Deaths. 4 = High, 1 Death. 3 = Moderate, Riddor, 24hr Hospital. 3 day sick leave. 2 = Work after 1st Aid on site. 1 = No risk.
Likelihood: 5 = V Likely. 4 = Likely. 3 = Quite Possible. 2 = Possible. 1 = Not Likely

		into dishwasher after every use by the user.					
		Available stock of cleaning products, disposable paper towels. All textile kitchen towels have been replaced with disposable paper towels.				Ensuring paper towels are available at all times.	Management Cleaning staff
	Not enough PPE/cleaning products	All businesses to contact the Facilities department and Group Audit Manager for any critical issues with their PPE/cleaning products.				All businesses must observe their stock of PPE/cleaning products.	Management
	Cleaners infected while cleaning	Cleaning staff instructed to wash their hands regularly with soap and warm water for 20 seconds and also after removing gloves. Appropriate PPE issued to the cleaning staff.				Regular reminders by line managers. Ensuring enough stock is kept.	Line managers Line managers
	Areas contaminated by COVID-19	Cleaning staff have been instructed to follow the specific process for contaminated by COVID-19 areas. External cleaning companies used to fog and disinfect the areas contaminated by COVID-19 as soon as a positive case has been confirmed and their whereabouts in the last 72 hours.				Ensuring the relevant PPE and cleaning products are in place. Checks to be carried out by line managers to ensure that the process is being followed.	Line managers
	Contaminated waste	Contaminated waste to be placed in plastic rubbish bags and tied when full and the plastic bag to be placed				To ensure enough bin bags are in place.	Line managers

Severity: 5 = V High, Multiple Deaths. 4 = High, 1 Death. 3 = Moderate, Riddor, 24hr Hospital. 3 day sick leave. 2 = Work after 1st Aid on site. 1 = No risk.
