

COVID 19 RISK ASSESSMENT

Completed by: Anna Hopkins

Location: Dawsongroup

Date: **28/05/2020**

Reviewed by & date:

Process/Equipment Area/People at risk	Hazards/Risk (Foreseeable)	Existing controls	Severity	Likelihood	Risk rating	Additional controls/action required	Action by	Complete
<p>Currently, government scientists are unable to quantify the increase/decrease in the rate of infection (risk of the spread of COVID-19) associated with individual preventative measures imposed upon the UK population to control the spread of COVID-19. This risk – the Spread of COVID-19 – is therefore quantified once in this assessment. No reliable data is available to quantify the effect on the likelihood of spread of the virus caused by the individual risks listed below the headline risk, for example, an inability to obtain PPE or cleaning products. Consequently, it is not considered helpful and may actually be misleading to guess the individual risk rating for individual risks and control measures.</p>								
Employees/customers/suppliers /visitors/contractors/tenants/ external cleaners/vulnerable groups - elderly, pregnant workers, those with existing underlying health conditions/anyone else who physically comes into business contact with DG employees.	Spread of COVID-19		5	3	15			
GENERAL CLEANING	Poor cleaning or irregular cleaning in workplace	<p>Increased frequency of cleaning regime to ensure 'high traffic areas', in particular the kitchen (kettles, microwaves etc), keypad at a gate, padlock (where applicable), door handles, desks etc are disinfected every 2 hours. Changing facilities must be kept clean.</p> <p>Cleaning staff instructed to wash up cups in hot soapy water or they must be put into dishwasher after every</p>				<p>Line managers to remind their staff. Cleaning rota to be put in place and initialled by cleaners to confirm completion. Rigorous checks to be carried out by line managers to ensure that the necessary procedures are being followed.</p>	Cleaning staff	

Severity: 5 = V High, Multiple Deaths. 4 = High, 1 Death. 3 = Moderate, Riddor, 24hr Hospital. 3 day sick leave. 2 = Work after 1st Aid on site. 1 = No risk.
Likelihood: 5 = V Likely. 4 = Likely. 3 = Quite Possible. 2 = Possible. 1 = Not Likely

		use by the user.					
		Available stock of cleaning products, disposable paper towels.				All textile kitchen towels to be replaced with disposable paper towels.	Management
